

What is Sustainability?

Sustainability can be defined as minimizing the destruction of natural resources while meeting our needs and leaving the world in a better shape for future generations.

Dear stakeholders, help us protect our natural resources for future generations.

- Save energy, avoid unnecessary energy consumption.
- Take shorter showers.
- Turn off the water when brushing your teeth and/or shaving.
- Flush the toilet as needed when you use it. (Full Flush use : 4,5 lt / Half Flush use :3 lt)
- Take care to reuse your clean towels.
- The effects of pharmaceutical, cosmetic and personal care product wastes on air, water and soil threaten life and leave negative impacts on natural resources. Avoid the use of products that may be considered harmful to the environment.
- Dispose of our garbage in the appropriate recycling bins.
- Avoid unnecessary use of paper and do not print unless necessary.
- If you see dripping faucets and/or water leaks, report it to the Guest Relations Desk or Reception.
